*Engaging people and communities in
climate change solutions*

Climate Stewardship Pledge

As an organization/individual concerned about global warming, I pledge to do one or more of the following:

- Learn about how climate change is already affecting lives across the globe.
- Be informed about climate stewardship and specific actions that support climate stewardship.
- Make my home more energy efficient.
- Buy locally.
- Support renewable energy production by purchasing renewable energy certificates.*
- Support constructive efforts we can take, as a state, to help reduce greenhouse gas emissions; for example through wind energy; perennial non-woody biomass (e.g. switchgrass and other native prairie grasses); coal gasification with carbon capture and geologic sequestration; and terrestrial carbon sequestration through good stewardship of prairie soils and wetlands.
